

ST 2000

Computerized Stencil Machine

- **CUTS STENCILS WITHOUT OPERATOR ASSISTANCE**

Saving time and errors. Stencils can be imported from a mainframe computer and cut directly with ST2000. Information can also be input and saved using a simple software program included with the machine.

- **WITHSTANDS HARSH INDUSTRIAL ENVIRONMENTS.**

Proven in steel mills and shipping yards around the world. ST 2000 sets the standard for dependable and rugged performance.

- **THREE TIMES FASTER THAN PLOTTER SYSTEMS.**

Cuts crisp, clean oilboard stencils at an average of 0.4 characters per second. No hanging "chads of oilboard". When a stencil is ready, it's cut automatically, while plotter systems require the operator to use scissors.

- **MADE IN GERMANY**

Supported by USA based factory trained technicians.

ST 2000 SPECIFICATIONS

- Uses 11" x 110 yds. rolls of standard oilboard.
- 24 font sizes from ½" to 8" (13 to 205 mm.)
