

IMPROVES MARKING EFFICIENCY!

To increase efficiency in production marking and inspection applications, a bench top holder for U-Mark Markers is now available. This holder fits the A10, A20, AP-1, AP-1 Fine Line, 100-P, 130P, and Tekmark Markers.

PROVIDES A PERMANENT HOME FOR YOUR INSPECTION MARKER

This compact holder can be mounted in a convenient location at the inspection station using two #8 screws or double backed carpet tape. The holder gives the marker a permanent home and keeps it ready for immediate use. Eliminating the need to remove and replace the standard slip cap frees the operator's other hand for faster handling of parts.

PREVENTS TIPS FROM DRYING OUT

This precision machined holder seals the nozzle and prevents the marker tips from drying out. Your inspection marker is more likely to stay where it belongs and easier to find on a workbench.

FEATURES

ENABLES ONE HAND OPERATION

LACK OF A PORTABLE SLIP CAP DISCOURAGES OTHER EMPLOYEES FROM BORROWING YOUR MARKER

A SPOT MARK CAN BE APPLIED TO THE HOLDER TO IDENTIFY MARKER COLOR
